

BALL JOINT PRESS AND CUP ADAPTERS

REMOVE AND INSTALL PRESS-IN TYPE BALL JOINTS WHILE THE VEHICLE IS ON THE HOIST!*

NEW & EXCLUSIVE

BALL JOINT PRESS BJP18100:

Truly a game changing tool, designed to remove and re-install most press-in type ball joints equipped on late model Ford and Dodge full-size pick-ups, as well as other trucks equipped with steering knuckles and ball joints. The design of this specialty tool is a complete departure from traditional C-frame based kits on the market. The BJP18100 utilizes patent pending technology that incorporates tenacious 2:1 pivoting action with durable forged alloy steel construction that both increases the effective pressing force of the tool and also lowers the operating weight down to approximately 20 lbs. Provides plenty of clearance between the frame, pivot link and cups, enabling the technician to remove and install ball joints while the vehicle is on the hoist when used with BJP18100C cup set.

Product Features & Benefits:

- Patented forged alloy steel design provides increased force and strength
- Large diameter, coarse thread jack screw for extra strength and maximum force
- Packaged in a blow molded case with space to upgrade and include the cup kit
- Service ball joints on the vehicle in a fraction of the time normally required
- Measures 12" W, 10" H, 2.5" D and weighs approximately 20 lbs.

Cup Kit BJP18100C:

Matco's accessory Cup Kit designed specifically for the BJP18100 Ball Joint Press offers the correct sizes to remove and install press-in type ball joints on late model Ford and Dodge full-size pickup trucks. Each cup is precision machined from high quality heat treated 4140 alloy steel, and the kit includes 9 sizes that not only fit late model Ford and Dodge pickups, but also many other ball joint applications on trucks and cars that utilize pre-fitted straight grease fittings.

Product Features & Benefits:

- Machined from high quality heat treated 4140 alloy steel
- Includes 9 cups to fit late model Ford & Dodge pickups
- Proprietary design keeps cups locked in place without need for adapters
